eCo-System

Innovative, cost-effective, user-friendly all-in-one communication system suitable for all work environments and -styles

We simplify the process of delivering enhanced wireless communication solutions for every working environment. Our eCo-System offers modular, scalable, and cost-effective solutions customized to provide efficient and dependable wireless communication wherever it is needed within a building, structure, or facility.

This flexibility extends to structures of varying sizes, numbers of floors, construction materials, and configurations, whether they are indoor or outdoor, stationary or mobile, or exhibit flexible layouts.

Each system can be configured with a comprehensive selection of base stations, headsets, and handsets to meet unique requirements. Additionally, location gateways and repeaters simplify the process of enhancing and expanding coverage across designated spaces, regardless of their size. This includes extensive areas, multiple floors, and is applicable to structures with complex layouts or signal-interfering materials. Furthermore, our solutions are adaptable for outdoor areas, if the need arises.

INNOVATIVE & COST EFFECTIVE

Innovative, cost-effective, user-friendly all-in-one communication system suitable for all work environments and styles; from offices to hybrid working, to call centers, healthcare facilities, schools, and even hotels, hospitality, and retail.

MULTIPLE CONNECTIVITY

With multiple (wireless) connectivity; connectable through VoIP, mobile network, DECT, Wi-Fi, and Bluetooth™, compatible with all conceivable devices and with the capability for seamless switching between different channels and/or devices.

USER-FRIENDLY & ONLINE TOOLS

Featuring a suite of user-friendly online tools with cost-effective services for the management, deployment, monitoring, site management, and tracking of wireless corporate installations of any scale.

UNLIMITED COVERAGE

Fully modular and scalable with unlimited coverage and a secure, stable connection; delivers effective, reliable, high-quality wireless communication in any parts of a building, structure, or facility.

RECYCLING & SUSTAINABLE

Fully sustainable with full product lifecycle management thanks to the solid designs, interchangeable batteries, our refurbishment policy and proper recycling.

Cloud Based Services

Suite of user-friendly online tools, for efficient management, deployment, monitoring, site administration, and tracking of all of your wireless installations, of any size.

Our platform is adaptable and can be tailored to align with your specific product portfolio, technical specifications, and brand identity. This customization empowers you to deliver a noticeably improved level of service to your customers.

Achieve Improved Outcomes and Enhanced Customer Satisfaction with less risk and less hassle

- Cloud-based deployment tool helps you plan sites and configurations, prior to installation
- Makes it easy to monitor installation sites and keep them updated with the latest software releases
- Effective way to manage your customers, licenses, and sites
- Diagnostic tools with customizable trigger events that help you improve customer service
- Provisioning and remote management of devices
- Easy tracking of handsets, Bluetooth™ devices, etc. for effective inventory management

BETTER SUPPORT - LESS WORRIES

Our Cloud Services simplify the process of delivering improved and faster support by addressing the practical complexities associated with deploying and managing large-scale solutions.

SPECIALIZED BUNDLED MODULES

The platform is constructed upon the aggregation of specialized modules within a user-friendly, cloud-based solution. The flexible licensing model further simplifies the process of choosing the precise options required for designing, deploying, and overseeing complete wireless communication systems.

A ROBUST SUITE OF SPECIALIZED TOOLS THAT SEAMLESSLY INTEGRATE

Acquire a collection of specialized tools that seamlessly merge the administration of wireless base stations, location gateways, handsets, headsets, and repeaters into a unified cloud-based solution. This user-friendly system not only streamlines the process but also results in time and manpower savings, minimizing operational complexities. Ultimately, it guarantees you to receive top service and support.

You can find more information about our Cloud Based Services on [our website](#).

UNITED

headsets

eCo-System hardware

With a focus on system integration, our portfolio is supplied in many different solution combinations including handsets, headsets, base stations, and repeaters.

United Headsets DECT Base Stations & Repeaters

The IP DECT base station setup is a state-of-the-art wireless solution that provides the user with complete mobility. Easy to use and supports multiple connectivity options. The system can be easily integrated into a cloud solution, ensuring easy maintenance, excellent security and flexibility.

- 29 devices per Base Station
- Expandable up to 6 repeaters per Base Station
- Scalable system from 1 to 4000 bases in the same network
- Scalability achieved through patented technology
- Can be installed & maintained remotely
- Customized software, endless possibilities
- Easy to integrate with telephone system
- Compact & sleek design

United Headsets DECT Handset

Thanks to the special ruggedized design, the handset is impact resistant. Wireless communication allows employees to communicate better with each other and with customers. The UH DECT system makes it easy to scale up with new DECT handsets as your business grows.

- HD audio support & Noise reduction (NC)
- 240 x 320 pixels TFT screen
- Emergency button at the top
- Bluetooth™ 4.1 & LE interface
- Firmware upgradeable over the air
- Conference & Call Waiting Options
- Talk time: up to 17 hours
- Standby time: up to 200 hours

United Headsets DECT headset & multi-charger (optional)

A wireless Mono DECT headset that can be used for clear communication in any retail environment. Choose the wearing style that suits you best: with an earhook, a headband or with a neckband. Make sure you always have headsets ready with the United Headsets multi-charger: charge up to 6 DECT headsets at the same time.

- HD audio headset
- Noise Canceling microphone
- Echo cancellation and noise reduction with DSP
- 3 different wearing styles possible
- 6 Polyphonic ringtones
- Perform updates wirelessly
- Talk time: up to 7 hours
- Standby time: up to 100 hours

eCo-System headsets
